EXPERIENCE

AI Engineering Intern June 2026 – Present
upGrad Education Private Limited Mumbai, India

- Developed a full-stack placement management platform using Next.js, Node.js, and Google Sheets, enabling real-time updates for **200+** placement records, automated dashboard reporting via Google Sheets and Power BI, and secure data validation.
- Through the design and deployment of a fully systematized end-to-end reporting and record management system, student data processing time was reduced by **78% (from 12-13 minutes to 2-3 minutes)** and achieved **100%** adoption across the placement department with zero manual errors.
- Developed an AI-powered FAQ chatbot serving **200+** students, resolving **80%+** of common placement queries without manual intervention and reducing support workload through self-service workflows.
- Created a **500+** company recruiter acquisition pipeline of hiring companies aligned to curriculum outcomes using curriculum-to-role mapping, Lusha sales intelligence, market research, lead qualification, and CRM-ready recruiter databases to drive employer partnerships and placement opportunities.

PROJECTS

- **Logistey- Give Your Warehouse A Voice.**
  - 1st place, KJSSE GajShield Hack X - National Level Hackathon
  - I created an AI voice assistant that handles calls with suppliers, keeps track of shipments, and turns talks into useful information. This helps cut down on delays, makes work smoother, improves teamwork, saves time, and reduces operational costs through intelligent automation across supply chains faster.
- **PairUp - Match. Connect. Create.**
  - 1st place, Devlynix Buildathon 1.0, National Level Hackathon
  - Built a **smart networking platform** that connects like-minded innovators based on skills, interests, and project goals using AI-driven recommendations, enabling faster formation of teams and collaboration.
- **Vaulted**
  - Special Recognition, HackwithMumbai 3.0 (Microsoft Hackathon)
  - Automated payments using on-chain escrow for freelancers with secure and dispute-free transactions.
  -Protection in case of disputes and transparency are guaranteed through secure smart contract execution without intermediaries or delays, while ensuring trust, accountability, and seamless payment settlement.

SKILLS SUMMARY

Languages: HTML, CSS, JavaScript, Java, Python, node.js, Go
Frameworks: Springboot, Django, React.js
Tools: Kubernetes, PostgreSQL, MySQL, MongoDB, Git, Microservices
Platforms: Kafka, Azure
Other Skills: Business & Strategic Analysis, User Research & PRDs, Leadership, Public Speaking, Time Management

PAPERS & PUBLICATIONS

- **Paper on 'Enhancing Cloud Security with AI-Based Intrusion Detection'**
  - A cybersecurity-focused paper on an AI-based intrusion detection system using Isolation Forest for real-time cloud threat detection, achieving over **95%** accuracy at sub-8ms latency.

EDUCATION

KJ Somaiya School of Engineering Mumbai, India
Bachelor of Technology in Robotics and AI July 2023 – April 2027

POSITIONS OF RESPONSIBILITY

- **MATLAB & IP Junior + CAM Senior** - Team KJSSE Robocon — Sept 2025 – April 2026
- **Creative Head** - KJSSE Rhapsody (College Drama Club) — July 2025 – June 2026
- **Co-Chief** - KJ Somaiya School Of Engineering, Digital Media Team — July 2024 – Aug 2025
- **FY Representative (Networking & PR Team)** - Alumni Cell KJSSE — Sept 2023 – April 2024

ACHIEVEMENTS & CERTIFICATIONS

- **3x Hackathon Champion:** Winner at national and global competitions (KJSSE Gajshield HackX, Devlynix Buildathon 1.0, **Special Recognition** - HackwithMumbai 3.0),
- **Certifications:** [**Google Certification**] - Foundations Of Project Management,
  [**Google Certification**] - Python Crash Course
